- ☐ a translation of the international application into \_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.

4. Additional comments:

**WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY**

International application No.  
PCT/US04/37946

**Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

**1. Statement**

Novelty (N)

Claims NONE YES  
Claims 1-21 NO

Inventive step (IS)

Claims NONE YES  
Claims 1-21 NO

Industrial applicability (IA)

Claims 1-21 YES  
Claims NONE NO

**2. Citations and explanations:**

Claims 1-21 lack novelty under PCT Article 33(2) as being anticipated by Whiting (US Patent # 4,637,616). Whiting teaches the claimed projectile and method for forming the projectile comprising a projectile core and a carrier and a colorant mixed and formed into a substantially firm predetermined core shape that is retained by the projectile core prior to impact of the projectile core upon a target, the core is adapted to support a coating, the colorant is a pigment dye, at least a portion of the core is adapted to disperse upon impact with a target. The carrier comprises one of a fibrous, absorbent material and a powder.

Claims 1-21 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
